

National Pricing & Market Intelligence — Dashboards

Tool: Power BI | Client: WX Brands (Bread & Butter Wines) | Period: 2022-2024

Overview

This report summarises competitive market intelligence for Bread & Butter Wines across 4 Canadian provinces (AB, BC, ON, QC) and 9 wine varietals, providing pricing, volume, and strategic positioning views used to identify growth opportunities and inform market expansion decisions.

Key KPIs Tracked

- 1. Total Market Volume & Revenue
- 2. YoY Volume Change
- 3. USA-Origin Share
- 4. B&B Volume & Market Share
- 5. HHI Concentration Index
- 6. CR3 / CR5 Ratios
- 7. Tier-Level Share Shift
- 8. Strategic Position Archetype

Dashboards in this Report

Varietal Exploration Dashboard — Market-level entry point. Covers total market revenue, volume, USA-origin share, and Bread & Butter's position by varietal. Includes a Top 100 brand leaderboard and seasonal sales trend vs. prior year.

Market Outlook Report — Strategic positioning layer. Tracks HHI market concentration, CR3/CR5 ratios, tier-level share shift dynamics, and Bread & Butter's archetype classification across 12 strategic positions per varietal per province.

Pricing Analysis Dashboard — Province-level competitive leaderboard for USA-origin wines by varietal and unit size. Shows volume rank, market share, retail price, price segment, and YoY growth alongside a price vs. volume scatter.

14	Gato Negro	Chile	91,473.07	7.80%
			4,370,310.98	-0.36%

Market Outlook Report

Model Overview

To objectively evaluate and differentiate product performance across diverse regional markets, a two-dimensional Strategic Positioning Model was engineered. This model synthesizes structural market power with growth momentum to eliminate subjective bias, mapping every varietal into one of 12 distinct performance archetypes based on a matrix of Market Position and Momentum.

Momentum

Expanding : Operational outperformance. Brand exceeding the baseline market YoY growth rate while capturing regional market share
Contracting : Operational trailing. Brand underperforming the baseline market YoY growth rate while simultaneously experiencing negative net market share growth
Steady : Neither clearly expanding nor contracting

Market Position

Leader ⇒ Rank by Volume <= 2
Core ⇒ Tier 1 Brands \ {Rank 1,2}
Challenger ⇒ Tier 2 Brands
Niche ⇒ Tier 3 Brands

Tier Segmentation

Brands are grouped by market volume contribution:
Tier 1 = Top 50% of volume
Tier 2 = Next 30% of volume
Tier 3 = Remaining 20% of volume

Varietal Selection

- ☒ Cabernet Sauvignon
☐ Chardonnay
☐ Glera
☐ Grenache
☐ Merlot
☐ Pinot Grigio
☐ Pinot Noir
☐ Red Blend
☐ Sauvignon Blanc

Reporting

Power BI Executive Report

Methodology

Data Preparation

Standardized raw sales data from four provinces with different reporting calendars into a unified seasonal framework, then cleaned, validated, transformed from wide to long format, and loaded into SQL Server using Python and pyodbc.

Dimensional Modelling

Designed a star-schema data model centered on a sales fact table with dimensions for products, provinces, origin countries, varietals, pricing segments, and calendar periods to enable scalable analytical reporting.

Analytical Modelling

Applied HHI and concentration ratios (CR3, CR5, CR10) to evaluate market competitiveness, developed a proprietary framework to classify brand-varietal-province combinations into 12 performance archetypes based on market position and growth momentum, and built an OLS regression model to remove promotional effects and forecast organic demand.

Visualization Design

Implemented a streamlined Power BI semantic model using analysis-ready datasets generated in T-SQL, improving dashboard performance while maintaining a clear separation between analytical processing and presentation layers.

Data Model
